Simco-Ion’s Aerostat PC Ionizing Air Blower provides localized coverage with superior charge decay efficiency. The Aerostat PC operates on AC technology and is designed to provide ionization to a targeted work surface.

Distinguished by its variable fan speed control, heater element, and emitter point cleaner, the Aerostat PC is an excellent choice for eliminating static in production processes. While helping to protect products and personnel from the effects of static discharge, the Aerostat PC is lightweight, small and quiet – making it easy for the user to direct the ionization where it is needed.

**Features**
- Discharge time of 1.5 seconds at 1 foot
- Lightweight, compact and quiet for unobtrusive use
- Built-in emitter point cleaner
- Variable speed fan for airflow control
- Status lamp indicates high voltage is present at the emitter points
- Integrated heater for warm airflow
- Optional fan air filter

**Benefits**
- Fast, targeted neutralization of static charges
- Directed ionization designed for workbench area
- Minimizes the time required to perform normal maintenance
- Matches ionization performance to the targeted work area
- Minimizes component loss due to unintentional ionization stoppage
- User comfort helps to insure that ionization remains on
- Protection for internal components from environmental contamination
Specifications

Input Voltage
- 120 VAC, 60 Hz: 1.7A (fan high, heater on); 0.1A (fan low, heater off)
- 230 VAC, 50 Hz: 0.9A (fan high, heater on); 0.05A (fan low, heater off)

Discharge
- 1.5 sec @ 1’ (30 cm) (1000-100V) fan high

Balance
- ±10V @ 1’ (30 cm)

Ion Emission
- AC ionization

Emitters
- Stainless Steel emitter points

Coverage
- 1’ x 5’ (30 x 152 cm) area

Controls
- HEATER ON/OFF switch; BLOWER ON fan speed control knob

Indicators
- Orange IONIZATION STATUS

Airflow
- 35-70 cfm

Heated Air Temp
- Fan high: 12-15°F (7-8°C) above ambient
- Fan low: 6-8°F (4-5°C) above ambient
  (measured @ 12” (30 cm) in front of blower)

Audible Noise
- Fan speed low 50 dB; fan speed high 57 dB at 2’ (61 cm) from unit

Air Velocity

Operating Env.
- Temperature 59-95°F (15-35°C); humidity 30-70% RH, non-condensing

Ozone
- 0.005 ppm measured 6” (15 cm) in front of unit; test conducted in accordance with EPA EQQA-0577-019 using Dasibi Ozone Monitor Model 10030AH

Air Filter
- 30 ppi open cell polyurethane foam (optional)

Mounting
- Metal Mounting Stand/Bracket included

Enclosure
- Aluminum/Polyester Epoxy

Weight
- 5.7 lbs (2.6 kg)

Dimensions
- 8.625”H x 5.5”W x 3.25”D (14 x 22 x 8.4 cm)

Warranty
- Two year limited warranty

Certifications
- 230V, 50 Hz
- UL 120V, 60 Hz

2. Velocity is FPM measured at center line of airstream.

Ordering Information

4003367 Aerostat PC with Heater, 120V, 60 Hz, North America
4003368 Aerostat PC with Heater, 230V, 50 Hz, Continental Europe
4008087 Aerostat PC with Heater, 230V, 50 Hz, United Kingdom
4015566 Aerostat PC with Heater, 230V, 50 Hz, China
4008465 Aerostat PC without heater, 100 VAC, 50/60 Hz, Japan
4016616 Aerostat PC without heater, 120 VAC, 60 Hz, North America
4010592 Aerostat PC without heater, 230 VAC, 50 Hz, Continental Europe
4016615 Aerostat PC without heater, 230 VAC, 50 Hz, China
4710017 Aerostat Air Filter Retainer
4100810 Aerostat PC Air Filter (6-pack)

Emitter Point Cleaner

The Aerostat PC features a built-in emitter point cleaner. Using the emitter point cleaner takes only seconds. Cleaning the emitter points prevents the build-up of airborne debris. This keeps your Aerostat PC working in top form for the life of the unit.

Applications

The Aerostat PC was designed for use with sensitive electronic components, where electrostatic charge is a problem. The Aerostat PC can also be used where static electricity causes problems such as the attraction of dirt to the product, misalignment of small parts due to electrostatic “jumping” and undesirable adhesion of plastic films due to electrostatic charge.

Use the Aerostat PC to eliminate static charges on small parts as they drop into the vibratory feeder bowl. Neutralizing the parts prevents them from sticking together and clinging to the sides of the bowl.

Discharge Times (typical)
