DECLARATION

PERSISTENT, BIOACCUMULATIVE AND TOXIC (PBT) CHEMICALS

January 2024

As required under the Toxic Substances Control Act (TSCA)[1], as amended by the Frank R. Lautenberg Chemical Safety for the 21st Century Act, the Environmental Protection Agency (EPA) issued five (5) final rules on January 6, 2021 to reduce exposures to certain chemicals that are persistent, bioaccumulative and toxic (PBT)[2] (the "Rules"). These chemicals build up in the environment over time and may result in potential risk to exposed populations, including the general population, consumers and commercial users, and susceptible subpopulations (such as workers, subsistence fishers, tribes and children).

The Rules limit or prohibit the manufacture (including import), processing, and/or distribution in commerce (including within articles) of the following PBT chemicals:

- Decabromodiphenyl ether (DecaBDE)
- Phenol, Isopropylated Phosphate 3:1 (PIP 3:1)
- 2, 4, 6-tris(tert-butyl)phenol (2, 4, 6-TTBP)
- Hexachlorobutadiene (HCBD)
- Pentachlorothiophenol (PCTP)

Simco-Ion an ITW Company (Simco-Ion) certifies that it is compliant with the requirements of TSCA regarding the five (5) PBT chemicals listed above and that none of the above-mentioned chemicals are intentionally used or added to our products.

This Declaration is based upon information provided to us by our suppliers of raw materials and/or components used in the manufacture of Simco-Ion's products.

For all TSCA inquiries related to Simco-Ion's products, please contact Steve Heymann.

Sincerely,

Steve Heymann

TSCA Section 6 Compliance Declaration

Subject: Compliance with United States TSCA Section 6 Restricted Substances

To whom it may concern,

Simco Ion hereby confirms compliance with the requirements of the United States Toxic Substances Control Act (TSCA), specifically Section 6, which regulates chemical substances determined by the Environmental Protection Agency to present an unreasonable risk to human health or the environment.

Based on a review of product composition, material data, and information provided by our suppliers and sub suppliers, Simco Ion provides the following statement:

Simco Ion products do not contain substances restricted under TSCA Section 6

This confirmation applies to all substances currently subject to restriction under TSCA Section 6, including but not limited to the persistent, bioaccumulative, and toxic substances regulated under Section 6h. It also covers any additional chemical substances that are subject to TSCA Section 6 restrictions as of the date of this declaration.

This statement is based on:

- Material content evaluations
- Supplier and sub supplier declarations
- Internal product knowledge and review processes

The declaration reflects actual substance presence and is not limited to whether substances were intentionally added.

Simco Ion maintains ongoing communication with its supply chain and performs due diligence to support continued compliance with applicable regulatory requirements.

This declaration is made in good faith and is accurate to the best of our knowledge as of the date listed above.

James Birt
