Dear Customer,

Subject: Raw Materials Export Controls From China

Simco-Ion has received questions regarding the impact of raw material controls on Simco-Ion Products. These raw materials include but are not limited to Tungsten, Molybdenum, Indium, Bismuth, Antimony, etc. The understanding from the Chinese Commerce Department Website is that these restrictions include bulk raw materials in large quantities and not smaller machined parts. Simco-Ion does not anticipate any major supply chain issues because of these restrictions. Simco-Ion is continuing to work with the supply chain to closely understand material challenges and put mitigation steps in place.

As always, Simco-Ion will continue to provide you with quality products as we adjust to these challenging situations. We appreciate your continued business and support of Simco-Ion Products.

Sincerely,

Jim Birt
Business Unit General Manager
